

## What's our story?

It all started in 2017. Disappointed by the slow expansion of e-mobility we created a whole new approach to electric vehicle charging. Our award winning and patented charging technology is the missing piece for mass electrification. Together with major automotive manufacturers we are currently getting our product ready to market. ChargeX was founded by passionate entrepreneurs and engineers. Our mission is a more sustainable way of transport. To make this green future happen we need your hands-on support and ideas to make our vision reality.

## What will be your job?

- Management of the electrical installation for urban charging hubs with our charging solution
- Profound knowledge about electricity and related norms to realize infrastructure projects lean and fast
- Manage and track customers and our engineering team with software and your communication skills
- Time-critical adaption to problems and quick decision making to prevent bottlenecks in our rollout plan

## What do we expect from you?

- Passion realizing large infrastructure projects and first practical experiences in project management
- University degree in electrical engineering or a comparable education – we focus on skills
- Outstanding organizing skills when managing several projects / PoCs at the same time
- Willingness and hands-on approach to learn new things

## What does ChargeX offer to you?

- Highly motivated team with flat hierarchies and fast-forward decision making
- Attractive equity/salary combination for a long-term career at ChargeX
- State-of-the-art equipment and team events on a regular basis
- A shitload of fun while making the world a better place

Now we need you. Be an essential part of our tech-startup ChargeX and our urban mobility revolution. Interested in joining us? Send us an e-mail why you have to be part of ChargeX.
